

**If you have industrial excess heat,  
you can produce cooling power from it!**

**Cheap - Eco friendly - Compact - Quiet - Low Maintenance**

**As a system partner of  Sortech, we integrate for you adsorption chillers into your waste heat process and produce clean and cheap cooling power from it: Turn Key!**

**Heat sources can be Solar power or excess heat of Milling center, Motors, Compressors, Diesel engines...**

**If you have a waste heat source available you can produce up to 30W of cooling power from 1 W of electrical auxiliary power.**

**Industrial eCoo adsorption chillers from Sortech are available from 12kW cooling power and scalable (12, 24, 36KW...)**

## Adsorption Chiller
